

KENDALL GAMMON

Helping business leaders and teams use **emotional strength** to embrace change, build stronger relationships, and directly impact success in self, family, and professional life.

Being a veteran NFL athlete, you may not expect Kendall Gammon to relate personal experiences or talk openly about vulnerability. But that's where he's found the value of emotional strength, and he uses this to create open, interactive sessions that appeal to a broad audience and provide practical tools for improving personal development and professional success.

“ Kendall provided an excellent address that was not only entertaining, but he had a meaningful message... I have heartily recommended him to my fellow managers.”

- Bruce Krehbiel, CEO, Kanza Cooperative Association

Kendall uses his keynotes and speaking topics to talk about emotional communication and how to use it to bring teams together and positively impact professional and personal success. He helps professionals understand ways of improving emotional communication with themselves and others, and discover how to better identify strong and successful connections. He also uses the SNAP framework to help you get what you desire out of life.

“ Kendall was an outstanding speaker, he delivered a great message that would be applicable to any industry.”

- John Hoffman, VP/General Manager, KSNF-TV
